Jordan Patel VIBE 101 "Hello, Vibes"

```
import json, os

def load():
return json.load(open("tasks.json"))

def add(text):
tasks = load()
new_id = len(tasks) + 1
tasks.append({"id": new_id, "text": text, "done": False})
json.dump(tasks, open("tasks.json", "w"))
print(new_id)

Prompt log:
Prompt 1: make a todo app in python
Prompt 2: add json saving
Prompt 3: add done command
Prompt 4: fix the bug
Prompt 5: make it better
```
