Leo Martinez VIBE 101 FRQ 2

(a) The code sorts the list so it changes the original. Also it doesn't sort in descending order.

(b)

```python
def top_n(scores, n):
 s = scores.copy()
 s.sort(reverse=True)
 return s[:n]
```

(c)

```python
 assert top_n([1,2,3], 2) == [3,2]
 assert top_n([5,1], 5) == [5,1]
```
