Zoe Campbell VIBE 101 FRQ 2

(a) 1) Use git so changes can be reverted. 2) Give the agent only the permissions it needs. 3) Require my approval before it runs delete commands. 4) Run tests before merging.
(b) I would not use an agent to write the authentication code because I need to understand every line, and review would take as long as writing it.
(c) The prompt log shows what happened, and DECISIONS.md shows why.
